

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph on page 9 immediately after the paragraph beginning with "Fig. 6 is":

Fig. 6A is a sectional view showing the spool according to an alternative construction of the first embodiment of this invention.

Please replace paragraph [0029] with the following amended paragraph:

~~The~~ As shown in Fig. 6, the side member 15 forms a wall 17 on the second side of the short cylindrical unit 14. A support shaft 18 is formed at the center of the wall 17. The support shaft 18 forms a part of the support mechanism 13. The support shaft 18 is orthogonal to the side member 15 and extends toward the first side of the short cylindrical unit 14. The center of the support shaft 18 coincides with the center of the short cylindrical unit 14. In an alternative construction of the support mechanism, shown in Fig. 6A, a support shaft 29a is formed at the center of wall 28. The support shaft 29a is orthogonal to side member 26 and extends in a direction away from the first side of the short cylindrical unit 14. An opening at the center of the wall 17a surrounds the support shaft 29a and forms a receiver shaft having a diameter that corresponds to the outer diameter of the support shaft 29a.
